

RENÉ DÁVILA LICONA

Data Analyst | Business Intelligence Analyst

CDMX, Mexico | +52 2281210115 | rdavilalicona@gmail.com | linkedin.com/in/rene-dl

SUMMARY

Data Analyst with experience designing, building, and maintaining enterprise analytics ecosystems across corporate banking and commercial sectors. Expertise in end-to-end Power BI development, Star and Snowflake schema data modeling, advanced DAX, Row-Level Security (RLS), and SQL engineering (stored procedures, ETL, query optimization). Proven track record leading cross-functional data initiatives—partnering with senior leadership to define business requirements, automating operational workflows with Microsoft Power Platform, and driving financial loss prevention strategies.

EXPERIENCE

BANCO AZTECA | CDMX, Mexico

Business Intelligence Analyst (Jan 2025 – Present)

- **Enterprise BI Ecosystem & Maintenance:** Lead the design, end-to-end development, and continuous maintenance of the business intelligence infrastructure across core banking units (Deposit Acquisition, Credit Performance, Operations, HR, and Sales Force) using Power BI and SQL Server.
- **Advanced Data Modeling & Security:** Architected scalable Power BI dashboards utilizing Star and Snowflake schemas, incorporating Row-Level Security (RLS) to enforce data governance and role-based access control; designed both granular operational reports and executive summary views for rapid decision-making.
- **SQL Engineering & Automated Pipelines:** Developed SQL queries, views, and stored procedures for data extraction, transformation, and direct report generation; integrated SQL Server with Power Automate to deliver automated daily variance reports (Top/Bottom 10 accounts) directly to the General Director.
- **Workflow Automation & Proactive Alerting:** Engineered multi-channel automated workflows in Power Automate, including automated notifications for credit risk reclassifications, proactive 30-day triggers for commercial offer expirations, and automated system reminders.
- **Low-Code Solutions & Process Digitization:** Designed and deployed custom Canvas Power Apps backed by Dataverse, SQL Server, and SharePoint to centralize data management; key solutions include a special offers tracking tool with compliance analytics, a file-ingestion tool for OneDrive, and an incident management platform recognized as a Finalist for "Most Visionary System" in internal innovation awards.

FARMACIA GOTAS DE ALIVIO | Veracruz, Mexico

Data Analyst (Oct 2024 – Dec 2024)

- **Commercial Analytics & KPI Definition:** Conducted end-to-end sales analysis using SQL and Python to define key performance indicators, evaluate margin profitability, and optimize product pricing strategies.
- **Interactive Dashboard Delivery:** Designed and deployed an interactive dashboard in Tableau to monitor revenue trends, inventory turnover, and product category performance, supporting data-driven decision-making for business owners.

KEY SKILLS

- **Business Intelligence & Data Visualization:** Power BI (DAX, Power Query/M, Data Modeling, Star/Snowflake Schema, RLS, Performance Analyzer), Tableau.
- **Data Engineering & Databases:** SQL (Stored Procedures, Query Optimization, CTEs, Joins), SQL Server, Python (Pandas, NumPy), Dataverse, Relational Databases & Data Warehousing fundamentals.
- **Automation & Enterprise Applications:** Microsoft Power Platform (Power Apps, Power Automate), Data Integration Pipelines, File Ingestion Workflows.
- **Strategy & Technical Leadership:** Technical Lead in Data Initiatives, Requirements Gathering, Stakeholder Management, Data Quality, Governance & Loss Prevention Analytics.

- **Languages:** English (C1), Spanish (Native).

EDUCATION

IBM | Coursera

Python for Data Science
